We provide **routine advice and support** to clinicians about safeguarding cases. We also offer a diverse range of **Level 3 training for GPs** and regular meetings with your Safeguarding Children LINK GPs. We both work two sessions a week for the CCG. The **Designated Doctors** aim to ensure that Health Providers work together to protect children. GPs may wish to discuss strategic safeguarding issues or escalation of cases following a multi-agency response. We are available to discuss or advise on health needs of Looked After Children, and those placed for Adoption. We advise on health issues for Foster/related carers and Adopters, working closely with our Nursing and Social Care Partners.
